

AUXILION AZURE QUICK START SOLUTION

Data Sheet

For Corporate, Public Sector & Enterprise

Auxilion, the global award winning Cloud Transformation & Support Company has extensive experience of implementing Azure solutions according to Microsoft best practice.

Overview

Auxilion have developed an Azure quick start solution that delivers a streamlined path for evaluating Azure cloud technology while containing project costs for your organisation. This solution quickly connects your on-premise infrastructure to the Azure platform in order to enable you to effectively evaluate the potential benefits of Azure for your organisation.

Windows Azure provides on-demand infrastructure and services that scales and adapts to your changing organisational needs. The *Auxilion Azure Quick Start* allows you to evaluate this environment in a practical sense.

Azure Quick Start Tenancy Configuration

The initial phase of the quick start solution and undoubtedly the most critical is capturing and designing the Azure infrastructure to best deliver the scalable services required. This includes:

- Create Azure Subscription
- Create storage accounts, virtual network, resource group
- Create Site to Site VPN
- Provision server in azure

Azure Commit

As part of the Azure quick start solution, Auxilion will deploy an Azure Cost Estimator. This has been designed to provide the IT manager of next generation organizations the ability to quickly assess running cost of the existing on-premises workload on Azure.

About the tool

1. The tool provides real world machine hardware usage
2. It recommends appropriate Azure instance to match the scanned workload
3. It also generates 31-day cost estimates of running such an Azure instance

Quick Start Benefits

- **Cost Analysis:** The tool helps identify the utilization and resource allocation on physical machines as well as guest VMs running on VMware and Hyper-V. The tool also helps determine the cost of running an on-premises physical or virtual machine workload on Azure.

- **Architecture:** Auxilion will help you determine the part that cloud infrastructure can play in your organization. From point solution, to hybrid infrastructure, Auxilion will help you determine the best fit to meet your current and future requirements.
- **Proven experience:** Auxilion's experience in producing cloud projects across the public and private sector is endorsed by Microsoft in our many and continued partner awards

About Auxilion

Auxilion moves corporate and public sector ICT real estates to the cloud and support them up there, thereafter. It's that simple! Auxilion provides three key services aligned to industry best practices.

Auxilion Services

Auxilion does 3 things:

1. Cloud Consultancy

Whether you are currently moving away from on premise, embracing a hybrid approach or already in the cloud, our team can support you before, during and after your transition.

2. Cloud Projects

From the desktop to the datacentre; on premise to the cloud, Auxilion is your single point of access for IT professional service and IT project delivery on everything cloud!

3. Cloud Support

Once in the cloud, Auxilion can support both your infrastructure and end users on a 24x7 basis.

Industry Awards and Recognition

Auxilion is a Global Award Winning Cloud Transformation and Support Company. We adhere to industry standards to guarantee the success of our cloud implementation projects.
