A SOLUTION OFFERING FOR  
CORPORATE & ENTERPRISE

# Microsoft Azure

Born and bred on it, Auxilion is a leading partner for the delivery of professional services around Microsoft Azure. Our cloud-first approach has been recognised by Microsoft as world-class.

## Microsoft Azure Overview

Microsoft Azure is a powerful and secure cloud computing platform and infrastructure that can be leveraged for building, deploying and managing applications and services through Microsoft's global network of managed datacenters. Azure is capable of providing both PaaS and IaaS services and can support many different programming languages, tools and frameworks, both Microsoft-specific and others. Effectively Microsoft Azure enables organisations to store data and run applications and services that can be accessed by your IT users on demand.

- Eliminate traditional upfront capital costs for infrastructure
- Scale up and down your consumption of services - as you need to.

## Benefits of the Azure Platform

- Easy to use and deploy
- Easy to manage, scale and flex
- Safe and secure

## What does Azure let you do?

Microsoft Azure enables you to:

- Build the required infrastructure to host, manage store and support you in the cloud
- Build services in a fast and cost effective way.

## Business Applications

- Easily allow developers to build and host websites
- Migrate and run applications onto virtual machines instantly

- Create scalable cloud application and services on PaaS
- Manage your data by scaling applications into the cloud using SQL Database and Server

## Deployment Options

Depending on your organisations requirements, Microsoft Windows Azure can be deployed in a number of ways.

### IaaS – Infrastructure as a Service

This involved the provision of virtual machines that can be quickly and easily managed and monitored

### PaaS – Platform as a Service

This involves leveraging the Azure platform to enable you to host you own applications

## Popular Applications of Azure

- Website Hosting
- Virtual Machines
- Data management
- Business Analytics
- Mobile & Remote Applications
- Cloud services
- Media Services
- Mobile Services
